Module Overview

Summary

The Simple File List module is a simple utility module that allows users to show all files within a specific directory within their DotNetNuke portal. This module does not allow for any additional "metadata" to be associated with individual files and simply works with the filename and a download link.

Module Features

- Allows administrators to quickly create a dynamic page showing the contents of a directory within their portal.
- Allows for automatic updating based on FTP dropped files.

Dependencies

Minimum DNN Version

This module requires DotNetNuke version 05.02.00 and later to function properly.

Other Dependencies

At this time the module has no dependencies other than the DotNetNuke requirement.

Security Notice

Given the (statement needs to be completed)

Module Installation

Overview

The module serves as a configuration portal for the host user to configure jobs. The module will not display any content to standard users. Each of the individual views will be discussed below.

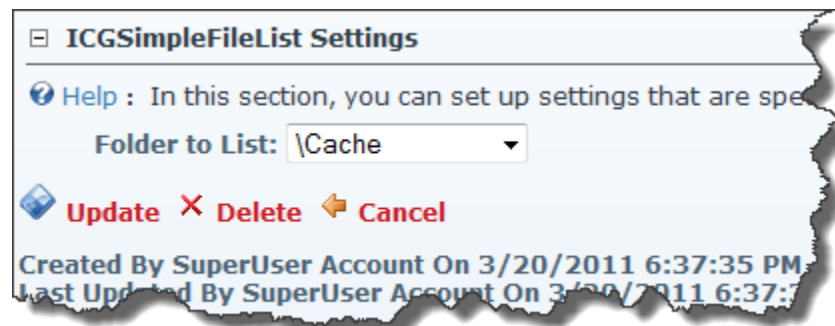

Administrator/Edit Permission Usage

Overview

From an administration perspective the module usage is quite simple. Once the module has been added to a page, a display similar to the following will direct users to configure the module:

Simply navigate to the "Settings" view for the module and you will see the following screen.

From here a listing of folder within the current "portals" folder will be presented. Select the folder to display and click update. This completes all administration configuration.

View Permission Usage

When users login they will see a listing of all files. To ensure security at this time the module strips out files with the following extensions.

- Template
- Htmtemplate
- Cs
- Vb

Future releases of the module will allow for more customization. A simple list will appear as follows.

Support and Requests

Feature Requests

As a free module development of this module is completed on a "as time exists" basis and new features are based greatly on user feedback. If you have a feature that you would like to see in a future version of this module please log it as a request in product support tracker <http://productsupport.iowacomputergurus.com>, or contact us webmaster@iowacomputergurus.com and we will gladly see what we can do to get it implemented.

If you would like to sponsor the development of a feature for this module options are available for this as well. If a feature is sponsored the edit log will be updated to reflect the sponsoring individual or organization.

Module Version History

All free modules provided by IowaComputerGurus Inc. are available with full source code if you have a need to modify the modules outside of the scope of our regular updates. Doing this will take you outside the scope of being able to upgrade in the future, the only requirement for use is that all copyright statements remain intact on all files.
